

# CO2A DRY VERGE APEX UNITS

## TECHNICAL DATA SHEET

### Product Details

The Tapco Slate Dry Verge Apex piece provides an aesthetic and durable finish to the top of the verge.

The Apex piece is manufactured from high grade 0.61mm thick pre-primed polyester coated aluminium. This system permanently secures slate applications on gable ends whilst protecting the verge from wind uplift and rain.

Dry Verge Apex Units are available in 90°, 105°, 120° and 135° angles.

### Product Features

- Extremely easy & quick to install.
- Requires no maintenance once installed.
- Can be customised.
- Suitable for use with both natural and man-made slates.
- Available in Black, Blue-Black or Brown.
- Supplied in a range of angles to suit most common roof pitches.
