

THE INDUSTRY'S MOST ADVANCED, DURABLE RIDGE & HIP VENTILATION SYSTEM

The RidgeMaster/HipMaster patented, internal baffle system “locks-out” wind-driven rain and snow from penetrating your roof.

Extremely durable design resists both high and low temperatures, which is why we can offer a 40-year manufacturers Warranty!

Ultrasonically sealed units create a solid barrier to prevent insects and roof debris from entering into the roof space.

Self-aligning, interlocking units to provide quick, accurate installation and continuous, unabridged ridge/hip ventilation.

Self-inclusive system providing 10,000mm²/m ridge/hip ventilation provision (BS 5250 compliant). No further high-level vent equipment required!

The most strongest, advanced, robust ridge/hip ventilators on the market. Resists damage caused by falling debris.

Rugged, crush-proof construction with nailing supports and structural ribs designed to ensure a smooth and straight roof line.

Built-in end caps improve weather resistance, simplify installation and easily adjust to roof pitch.

The Ship-Lap design allows for expansion and contraction of the units during hot & cold temperature cycling.

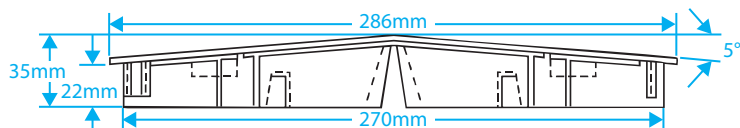

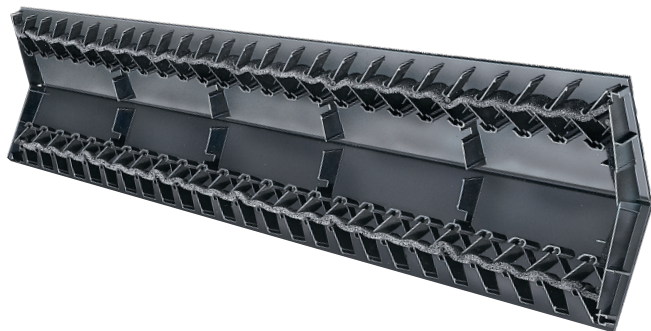

RidgeMaster/HipMaster can be fixed to roof pitches as low as 14° on both felt & batten and fully-boarded roofing applications (45° maximum pitch).

And let's not forget our incredible 40-year Warranty! The warranty is automatically applied as soon as your RidgeMaster and/or HipMaster products are delivered to site, so you can sit back, relax, and know that your roof ventilation products are fully covered!

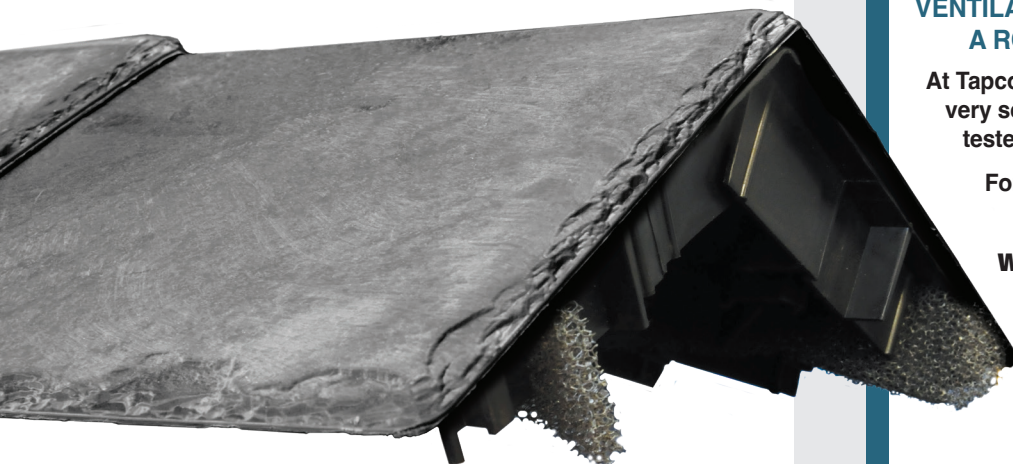

RidgeMaster®

Each RidgeMaster unit measures 1.2m in length
Provided in boxes of 10 units to cover 12 linear metres

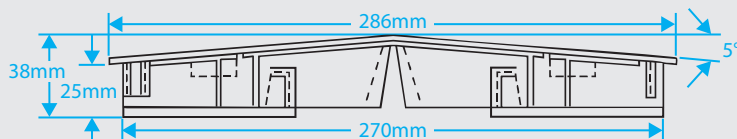

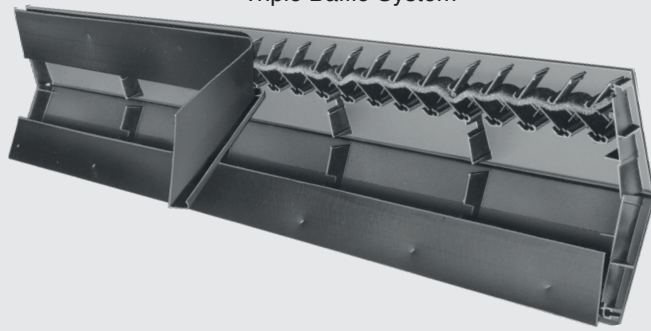

- ✓ Provides 10,000mm²/m ridge ventilation.
- ✓ Compatible with composite roofing tiles and ridge caps (TapcoSlate and DaVinci Select Shake included).
- ✓ Compatible with metal roofing tiles and flat-style ridge caps.
- ✓ Compatible with wood shake/shingle roofing tiles and ridge caps.
- ✓ Compatible with lead (or lead substitute) formed ridge.

Note: RidgeMaster & HipMaster products have been specifically designed to be covered by TapcoSlate or DaVinci Select Shake ridge/hip caps. Other, light-weight caps can be used but please refer to the size specification for compatibility. It is inadvisable to use the products with heavy Concrete, Clay & Iron ridge & hip caps.

HipMaster®

Triple Baffle System

Each HipMaster unit measures 1.2m in length
Provided in boxes of 10 units to cover 12 linear metres

- ✓ Provides 10,000mm²/m hip and ridge ventilation.
- ✓ Compatible with composite roofing tiles and ridge/hip caps (TapcoSlate and DaVinci Select Shake included).
- ✓ Compatible with metal roofing tiles and flat-style ridge/hip caps.
- ✓ Compatible with wood shake/shingle roofing tiles and ridge/hip caps.
- ✓ Compatible with lead (or lead substitute) formed ridge and hips.

ROOF VENTILATION
